When completed, each row must contain the numbers 1 through 9 only once.

In this example puzzle, each box "coded" with a STAR symbol was a 1 and each box "coded" with a HEART symbol was a 3 unless it was a starting 1 or 3 as seen in the starting puzzle on the left page.

IN THIS EXAMPLE PUZZLE:

ALL  CODE SYMBOLS = 1s

ALL  CODE SYMBOLS = 3s

If a number is assigned a code, such as star or heart as in this example, then every time that number appears in the puzzle, it will appear in a corresponding "coded" box UNLESS IT WAS A STARTING NUMBER.
