

Together, the Startdl puzzles are a solid, well-rounded package that will appeal to a broad variety of puzzling tastes. This grouping includes games for number people, word-lovers and code breakers. While these puzzles work very well as a team, they can also be purchased individually.

Feature Highlights

▪ **Add Them Up:** It's a crossword puzzle for all the number people out there! You will find not one single letter in the completed grid of an Add Them Up puzzle. Instead, each "word" in the solution is a number whose digits add up to the sum given in the clue, and no "word" contains any digit (0 through 9) more than once.

▪ **Cryptorelated:** Cryptorelated is a fun new twist on the age-old cryptogram theme. Instead of a sentence or quotation, each Cryptorelated puzzle features a list of words, all tied together by a common theme. The entire puzzle shares a single code, so solving one item on the list will often help you with several others.

▪ **Decoder:** Still can't get enough cryptograms? Neither can we, so here's an extra one to start each week! Corresponding letters are filled in throughout the puzzle as you work to break the code.

▪ **Quote In a Box:** Comprehending the quotations of historical figures can be somewhat challenging at times, and we've made it even harder! The letters in each column of the grid, when dropped into the puzzle in the correct order, will spell a thought-provoking quotation from a famous source.

▪ **In Between & Among:** It has quotations, it has wordplay and it has clues and answers and hidden messages. What more could a puzzler ask for? Each week, In Between & Among presents you with a word clue and a row of letter groups. Select the groups that fit together to form the solution to each clue, and the remaining letters will form a hidden message!

About the Creator

STARTDL™ Puzzles and Word Games has been entertaining and satisfying readers for nine years. Since 1994, Seza Waller and her staff have been creating and producing a variety of more than 36 different games, including the popular Add Them Up, Quote In a Box, Hidden Quote, Decoder and Cryptorelated. They constantly strive to provide enjoyment to their readers with new and better puzzles.

STARTDL™ has its own general magazine, and as a result of consumer demand, they will be publishing a separate Add Them Up version shortly.

STARTDL™ clients include leading newspapers in Canada, the Official Publications in the U.S. and soon, VIA Rail in Canada.

"This is a culmination of a childhood dream come true," says Seza Waller, "and we take much pride in knowing that we can satisfy such a large number of readers with a variety of games!"
